Electric Alarms

INSULATION

Thermal Hull over waterline and Superstructure insulated by glass wool, and sound damping foil.

Full out of the water service 9/2023

Комментарии брокера:

One of the famous Pacific Class 85 series that was built at Cammenga under Lloyds in 1972 by a design of W. de Vries Lentsch. Steel hull and superstructure with teak decks. Original layout has been changed with master cabin now on the main deck with ensuite bathroom. Below deck she offers 2 guest cabins all with bathrooms ensuite and one king VIP cabin. One crew cabin for 3 persons in the front. Powered by twin Gardners engines each 172 Hp. With the tender on the bow installed many square extra meters are available as deck area resulting in an amazing al Fresco area aft on the flybridge. She is a fine example of a proven timeless solid yacht build in the Netherlands. Her volume and practical layout makes her an ideal family yacht to cruise in style and elegance. Under 24m on paper.
